TITLE New England Regional Student Program Enrollment Report.

INSTITUTION New England Board of Higher Education, Wellesley, Mass.

PUB DATE 79

NOTE 60p.

EDRS PRICE MF01/PC03 Plus Postage.

DESCRIPTORS *College Students; Community Colleges; Comparative Statistics; Education Majors; Engineering Education; *Enrollment Rate; Enrollment Trends; Forestry; Health Occupations Education; *Higher Education; Junior Colleges; Pharmacy; State Colleges; State Universities; Technical Institutes

IDENTIFIERS Connecticut; Maine; Massachusetts; New Hampshire; Rhode Island; *United States (Northeast); Vermont

ABSTRACT

A regional student enrollment statistical report for the 1977-1978 academic year is provided for Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. Areas covered in the report are: the Non-Contract Program; state participation; students attending New England two-year colleges and institutes; students attending New England state colleges; students attending the six state universities, University of Lowell, and Southeastern Massachusetts University; and the Health Professions Contract Program. Several highlights are noted: enrollment in non-contract study increased by 107 students or 3.1 percent; enrollment shows use of 591 degree programs offered for regional enrollment by public colleges and universities in the region; and enrollment is highest in the fields of Pharmacy, Forestry, Education, and Engineering. A list of New England Regional Student Representatives is appended. (LC)

NEW ENGLAND REGIONAL STUDENT PROGRAM

ENROLLMENT REPORT

HIGHLIGHTS 1977-78

- Enrollment in non-contract study programs increased by 107 students, or 3.1 percent, for a total of 3,565 students at 62 of the region's public colleges and universities
- Enrollment in health professions contract programs totals 415 in the fields of medicine, optometry, occupational and physical therapy, and veterinary medicine
- Enrollment shows use of 591 degree programs offered for regional enrollment by public colleges and universities in the region
- Enrollment is highest in the fields of Pharmacy, Forestry, Education, and Engineering

THE NON-CONTRACT PROGRAM

Enrollment in the non-contract area of the Regional Student Program increased by 107 students (three percent) this year for a total of 3,565. The single largest increase occurred at the university undergraduate level, where 186 more students were enrolled this year than last. The public universities reported increased undergraduate enrollments ranging from seven at the University of New Hampshire to 35 at the University of Massachusetts at Amherst. Allowing for a net decrease of 79 students at the university graduate level, overall enrollment under the Regional Student Program at the university level shows a 5.6 percent increase, impressive when compared to the general decline of 1.5 percent at the region's public universities shown in statistics published by the National Center for Educational Statistics (NCES).

Increases in enrollment of regional students were experienced at the state colleges in Massachusetts, New Hampshire, and Rhode Island, while the Vermont State College System, traditionally a major importer of students, reported 50 fewer students this year than last. Overall, state college enrollment increased by 3.2 percent.

Enrollment at the two-year colleges and institutes appears to have leveled off after several years of growth. In fact, the region as a whole reported a net decline of 1.5 percent in regional students. In large measure this was caused by a reduction of enrollments in the public community colleges in Massachusetts (the NCES data cited above shows that total enrollment in the Massachusetts Community Colleges declined by over 2,700 students), where there are 113 fewer regional students than a year ago. The only significant increase - 75 students - was reported by the Rhode Island Junior College.

Regional students were enrolled in 591 of the 794 degree programs offered under the Regional Student Program in 1977-78. As has been the case in the past, the large majority of programs showed regional student enrollment of five or fewer, with no resultant impact on the cost to the institutions of operating these programs.

Forty-nine programs (8.4 percent) reported regional student enrollment of 15 or more, which enrollment might necessitate the hiring of additional faculty. Programs showing enrollment of 15 or more regional students were reported in all six states; Connecticut reported 4, Maine 11, Massachusetts 16, New Hampshire 2, Rhode Island 11, and Vermont 5.

At the two-year colleges and institutes, the majority of students enrolled under the Regional Student Program have taken advantage of the "proximity rule"; they are enrolled in programs which are available in their home state but which are also available at an out-of-state institution closer in traveling time to their legal residence. At Rhode Island Junior College, 223 of the 225 regional students are from the bordering state of Massachusetts. Thirty percent of the students enrolled at this level are in arts and sciences, liberal arts, or general studies programs.

Pharmacy programs continue to show the greatest numbers of regional students enrolled in any one field of study; the University of Connecticut reports 134 students in its program and the University of Rhode Island 183. These 317 students constitute 31.1 percent of the total undergraduate regional student enrollment at the region's universities. Other bachelor degree programs continuing in popularity are Criminal Justice, in which 93 regional students are enrolled at the University of Maine at Portland/Gorham; Forestry, in which a total of 133 students are enrolled at the Universities of Maine at Orono, Massachusetts at Amherst, and New Hampshire; and Recreation, in which 134 students are enrolled in six programs at various institutional levels. Degree programs in Engineering, Education and Environmental Studies or Sciences are also popular.

At the graduate and professional level, the University of Maine reports 58 regional students enrolled in its law program, while 25 New Englanders are enrolled in the same degree program at the University of Connecticut. Master's degree programs in Library Science (at the University of Rhode Island) and Social Work (at the University of Connecticut) remain popular, as do doctoral degree programs in Education at the Universities of Connecticut and Massachusetts.

STATE PARTICIPATION

Imbalances in the numbers of students entering and leaving a state under the Regional Student Program are evident this year as they have been in the past. Connecticut and New Hampshire are once again net exporters of students; Rhode Island and Maine remain net importers of students. Massachusetts, which exports 56 more students than it imports, and Vermont, which has a net import of 62 students, come closest to a "balance of trade".

STATE	1977-78			1976-77
	IN	OUT	NET FLOW	NET FLOW
Connecticut	449	899	450 Out	448 Out
Maine	575	216	359 In	313 In
Massachusetts	1,133	1,189	56 Out	69 In
New Hampshire	283	594	311 Out	301 Out
Rhode Island	764	368	396 In	216 In
Vermont	361	299	62 in	151 In

It is interesting to note that residents of Maine and Rhode Island, which rank sixth and fourth respectively in the numbers of students leaving a state, take advantage of a very small percentage of the programs open to them under the Regional Student Program. Students from Maine are enrolled in only 89 (18 percent) of the 473 programs open to residents of that state; Rhode Islanders are enrolled in only 130 (21.2 percent) of the 611 programs offered to them. It is hoped that NEBHE's increased efforts to publicize the Regional Student Program will make more students aware of the opportunities available to them in the region.

The charts on the following pages summarize each state's participation in the Regional Student Program for 1977-78.

HEALTH PROFESSIONS CONTRACT PROGRAM

Enrollment under NEBHE-administered contracts for student spaces has decreased 16.3 percent this year, from 496 to 415. This decrease is almost entirely due to the phase-out of contractual arrangements for Massachusetts residents at the University of Vermont College of Medicine and the termination of the NEBHE/State of Maine agreement with the same institution. Enrollment of contract students at the New England College of Optometry continues to grow, however, as does the enrollment of veterinary medical students at the University of Pennsylvania School of Veterinary Medicine and the New York State College of Veterinary Medicine at Cornell.

The Health Professions Contract Program differs from the general Regional Student Program in that the large majority of participating students are enrolled in private institutions. In some cases, students are considered for participation on the basis of financial need and part or all of the subsidy monies received are used to reduce educational expenses for participants. Such is the case for the 263 undergraduate students enrolled in the physical and occupational therapy programs at Boston, Northeastern and Tufts Universities. In other cases, only those students who are participants in the contract program are admitted to the institution.

As the expenses involved in reserving student spaces in high-cost professional programs increase, so do the complexities of contracting. Three of the five New England states for whom NEBHE administers contracts now require that participating students repay the state's expenditure, either in services or financially. State administration of repayment or return-service plans is likely to prove as complex as the administration of the actual contract arrangements.
